Inner layer	Aluminum foil fiberglass
Closure	Zip with flap
Brand	FireHush
Base SKU	FH-DOC

About this product

Keep the papers you cannot replace in one place you can grab on the way out. Three layers: a silicone-coated outer shell, an aluminum-foil fiberglass lining, and a zip closure with a flap.

Two shells. Fiberglass is rated 550 to 1,100 °C. High-silica is rated 1,000 to 1,700 °C for more time in a hotter fire.

Paper chars well below these temperatures, so no bag can promise papers survive every fire. A bag buys time and keeps contents together and dry.

Options and SKUs

SKU	Shell
FH-DOC-FG	Fiberglass, 550 to 1,100 °C
FH-DOC-HS	High-silica, 1,000 to 1,700 °C
